

**Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims:**

- 1 (original): An audio player comprising:
- 5       a memory for storing a first audio file and a first text file, the first text file containing  
          texts of the corresponding first audio file;  
          a user interface for selecting the first audio file;  
          a controller for loading the first audio file and the first text file;  
          a decoder for converting the first audio file into audio signals;  
10       an audio output port for outputting the audio signals;  
          a video output port for displaying texts stored in the first text file on a display device  
              electrically coupled to the video output port; and  
          a text calculating circuit for calculating a rate at which text is displayed on the  
              display device according to a predetermined relationship between a duration of  
15       the first audio file and a size of the first text file.
- 2 (original): The audio player of claim 1 further comprising a first linking file stored in  
          the memory, the first linking file utilized for linking the first text file to the  
          corresponding first audio file.
- 20       3 (original): The audio player of claim 1 further comprising a first image file stored in the  
          memory for serving as a background image when text from the corresponding first  
          text file is displayed on the display device.
- 25       4 (original): The audio player of claim 1 wherein the predetermined relationship for  
          calculating the rate at which text is displayed on the display device satisfies the  
          equation  $F=T/N$ , where  $F$  represents a moving frequency at which text is displayed

on the display device,  $T$  represents the duration of the first audio file and,  $N$  represents a quantity of text stored in the first text file.

5 (original): The audio player of claim 4 wherein the user interface is utilized for selecting  
5 a calculation mode of the audio player.

6 (original): The audio player of claim 5 wherein the quantity of text  $N$  is selected from a  
group consisting of  $N_C$ ,  $N_W$ ,  $N_S$ , and  $N_P$  according to the selected calculation mode,  
wherein  $N_C$  represents a number of characters in the first text file,  $N_W$  represents a  
10 number of words in the first text file,  $N_S$  represents a number of sentences in the first  
text file, and  $N_P$  represents a number of paragraphs in the first text file.

7 (original): The audio player of claim 1 wherein the user interface comprises input  
buttons for scrolling through the text displayed on the display device.  
15

8 (original): The audio player of claim 1 wherein the user interface comprises input  
buttons for changing the rate at which text is displayed on the display device.

9 (original): The audio player of claim 1 further comprising an interface port for  
20 transferring files from a host device to the memory of the audio player.

10 (original): The audio player of claim 1 further comprising a character set file stored in  
the memory, the character set file containing a list of all characters included in all  
text files stored in the memory of the audio player.  
25

11 (original): The audio player of claim 1 wherein the decoder is an MP3 decoder.

12-22 (cancelled).
